

2020

Stormwater Sessions Live! is back in 2020 and ready to address the challenges of the next decade. What can we learn from “big data” or failed practices? How can we work across the public/private divide to better address long-term success? We don’t have all the answers, but our presenters might!

ISWEP is proud to offer our annual webinar series at discounted rates for members. City and Educational members should use code “ISWEP20A” and Professional members should use code “ISWEP20B” when registering. Discounts are also provided for groups at one office.

MAY 12
